SPACE ISAC

MEMBERSHIP BROCHURE

SECURING OUR GLOBAL SPACE ASSETS

Space ISAC is the global information sharing and analysis center for the space sector: five hubs on four continents, a 24/7 Global Watch Center, and the organizations that build, launch, and operate space systems defending their missions together.

120 MEMBERS | 17 NATIONS | 5 GLOBAL HUBS | 36 AGENCY PARTNERS

The space sector's collective defense

Space ISAC is the only global, industry-led Information Sharing and Analysis Center for the space sector. Its members — operators, launch providers, primes, startups, laboratories, and universities — share threat intelligence, coordinate vulnerability disclosure, and build collective defense across commercial, civil, and allied government stakeholders. It is a member of the National Council of ISACs and a participant in the European Council of ISACs.

120
MEMBER ORGANIZATIONS

17
MEMBER & PARTNER NATIONS

24/7
GLOBAL WATCH CENTER COVERAGE, FIVE HUBS

1,000+
MACHINE-TO-MACHINE INDICATORS SHARED EACH WEEK

THREE WORDS CARRY THE MISSION

Intelligence

Global, space-specific threat intelligence from industry and government, shared across 120 member organizations. Intelligence is what we share.

Resilience

Operational sharing designed into space systems security programs, so members anticipate, withstand, and recover from disruption. Resilience is what members gain.

Trust

A vetted, protected environment enabling honest, operationally relevant exchange across allies and partners. Trust is what makes sharing possible.

BORN OF A SHARED NEED

2017
Conceived
The Science & Technology Partnership Forum identifies information-sharing gaps in the cybersecurity and space community.

2018
Announced
The idea is presented at the 34th Space Symposium in April.

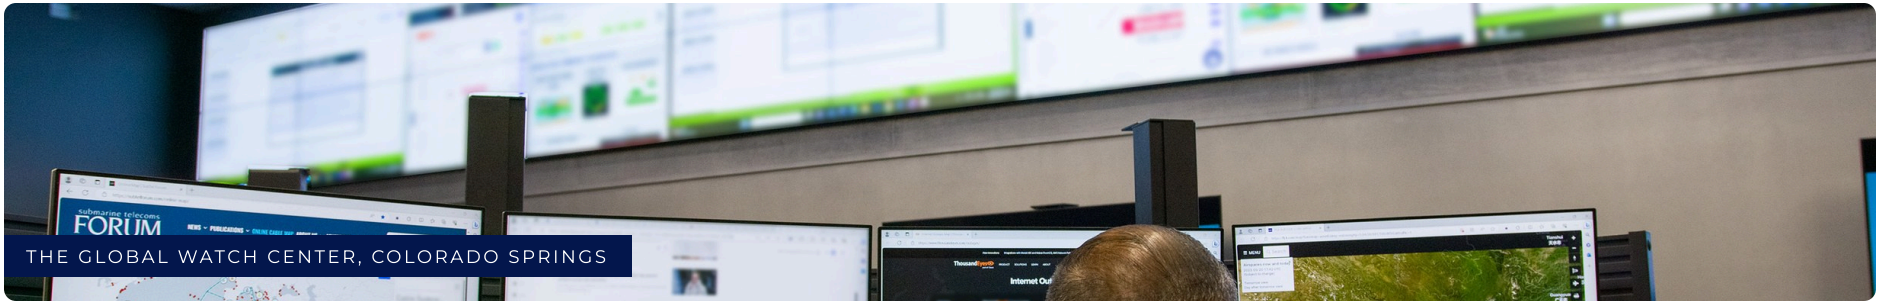

2019
Established
Space ISAC is founded in April, headquartered in Colorado Springs, Colorado.

2020
U.S. recognition
Joins the National Council of ISACs as an official member.

2023
European recognition
Becomes a participant in the European Council of ISACs.

2026
Global today
Five hubs on four continents, a 24/7 Global Watch Center, and allied partners from NATO and the UK Space Agency to the ROK Air Force and JAXA.

Where the sector acts on threats together

THE GLOBAL WATCH CENTER, COLORADO SPRINGS

Space ISAC is the sector's all-threats source for information on vulnerabilities, incidents, and threats to space systems across the ground, link, space, launch, and user segments — and the place where operators, primes, startups, labs, and agencies act on it together.

Global Watch Center

Analysts monitor cyber, RF interference, space weather, and on-orbit threats around the clock and publish daily and weekly summaries, advisories and alerts, and executive threat briefs to members — more than 1,000 machine-to-machine indicators a week. Quarterly TLP:CLEAR reports are released publicly; members receive TLP:AMBER and TLP:RED reporting.

Training and exercises

Tabletop exercises, workshops, and courses that prepare organizations to respond to attacks on space missions, ground systems, and supply chains. Members receive free or discounted seats; the Space Resiliency Crosstalk Series launches in 2027.

Vulnerability Lab and Testbed

The Cyber Vulnerability Lab performs technical security assessments of space technology; the Space Innovation Test Bed and Proving Ground let members pitch, validate, and test capabilities against realistic space-system environments.

Collaborative groups

Eleven member-led working groups, communities of interest, task forces, affinity groups, and Watch Center standups — from supply chain and xBOM to quantum, AI/ML, cislunar operations, and space governance — where practitioners set the sector's shared positions.

Value of Space Summit

The annual gathering of members, government partners, and international allies, held every year since 2020. VOSS VIII: August 30 – September 2, 2027, Colorado Springs. Members attend on complimentary passes by level.

Information Sharing Portal

The secure platform where reporting, disclosures, and member discussion happen, with content tagged and distributed by Traffic Light Protocol marking so that what members share stays where they intended.

> "The Space ISAC construct has created the conditions for the space industry to collectively protect and defend its missions and the invaluable services they deliver to our critical national infrastructures."
>
> KEV JONES · DIRECTOR, SECURE SPACE SYSTEMS, CGI

Five hubs, 17 nations, 36 agency partners

GLOBAL HUBS

Threats to space systems don't respect borders. Space ISAC operates through regional hubs that share intelligence, run exercises, and convene members in their own time zones — one membership, connected everywhere.

Levels sized to the organization

Open to organizations that build, launch, operate, secure, or study space systems; government agencies participate as partners. Every level includes Global Watch Center reporting, the Information Sharing Portal, collaborative groups, vulnerability disclosures and industry reports, Value of Space Summit passes, and the member directory. Levels differ in seats, passes, and pitches. Annual dues in U.S. dollars.

FOUNDING

$100,000

THE HIGHEST LEVEL OF MEMBERSHIP

- A seat on the Space ISAC board of directors
- 25 Information Sharing Portal accounts
- 10 Value of Space Summit passes
- Free training courses
- 6 Test Bed project pitches · 6 testbed and proving ground offerings
- 5 liaison and Fellows Program participants
- Unlimited collaborative groups
- Steering committee participation
- Strategic advisory services
- Open to new and existing members

CORPORATE

$50,000

PLATINUM

- 15 Information Sharing Portal accounts
- 5 Value of Space Summit passes
- Free training courses
- 5 Test Bed pitches · 4 testbed and proving ground offerings
- 3 liaison and Fellows participants
- Assign analysts to the Global Watch Center
- Custom threat scenarios
- Steering committees · unlimited collaborative groups
- Strategic advisory services

CORPORATE

$25,000

GOLD

- 5 Information Sharing Portal accounts
- 3 Value of Space Summit passes
- 50% off training courses
- 4 Test Bed pitches · 3 testbed and proving ground offerings
- 2 liaison and Fellows participants
- Showcase capabilities in the Global Watch Center
- Unlimited collaborative groups
- Strategic advisory services

CORPORATE

$10,000

SILVER

- 2 Information Sharing Portal accounts
- 2 Value of Space Summit passes
- 25% off training courses
- 3 Test Bed pitches · 2 testbed and proving ground offerings
- 1 liaison and Fellows participant
- Unlimited collaborative groups

SMALL BUSINESS

$5,500

SMALL BUSINESS PLUS

- 1 Portal account · 1 VOSS pass
- 25% off training courses
- 2 Test Bed pitches · 1 testbed offering

Annual revenue between $5 million and $20 million

SMALL BUSINESS

Less than $5M

ANNUAL REVENUE

Ask for special rates. If your annual revenue is under $5 million, tell us about your organization and we will put together a rate that works.

info@spaceisac.org

RESEARCH

$5,500

LABORATORY

- 1 Portal account · 3 VOSS passes
- 25% off training courses
- 3 Test Bed pitches · unlimited testbed offerings
- Unlimited collaborative groups

ACADEMIA

$4,500

UNIVERSITY

- 1 Portal account · 5+ VOSS passes
- 25% off training courses
- 3 Test Bed pitches · unlimited testbed offerings
- Unlimited Fellows Program participants

Need a level that isn't listed, or a multi-entity arrangement? The board can approve custom structures — ask at info@spaceisac.org.

From application to onboarding

Membership is by application and subject to approval. Most organizations move from application to onboarding within a few weeks.

01
Apply online
Complete the membership application at spaceisac.org/membership with your organization's details and market sector.

02
Review
The team confirms eligibility and the right level, and completes the screening required of every applicant.

03
Agreement and dues
Sign the membership agreement and settle annual dues.

04
Onboard
Portal accounts are provisioned, your representative is briefed, and you're introduced to the collaborative groups.

WHO JOINS

- **Operators and integrators.** Satellite owner-operators, launch providers, ground segment operators, and the primes and integrators who build their systems.
- **Small and emerging companies.** Startups and small businesses building space and space-security capabilities, with the same intelligence as the primes.
- **Security and intelligence providers.** Cybersecurity, threat intelligence, and resilience companies serving the space sector.
- **Laboratories and universities.** National and federally funded labs, research centers, and universities advancing space security research, workforce, and testbeds.

FROM THE MEMBERSHIP

> "As a small business, the exposure and access to larger global organizations has been of significant value to the evolution of our company and technology."
>
> DARRIN C. LEE, J.D. · PARTNER AND CO-FOUNDER, NVIRTUA INTERNATIONAL

> "Joining Space ISAC represents a chance to bring Italian and European expertise to an international effort to protect space infrastructure and missions."
>
> LUIGI MARTINO · CEO, DAMOTECH
