

COLLABORATING TO PROTECT OUR SPACE SYSTEMS

Space ISAC brings together leaders throughout the global commercial space industry to share threat data, analysis, and critical intelligence in order to safeguard both commercial and defense interests in space.

Space ISAC works around the clock to disseminate timely and actionable intelligence among member companies. Our organization serves as the clearinghouse and primary communications channel for threats and vulnerabilities in the space sector.

We are the **ONLY** all-threats security information source for both the public and private space sectors. Space ISAC facilitates collaboration across the global space industry to enhance your companies' ability to prepare for and respond to vulnerabilities, incidents, and threats.

BENEFITS OF JOINING SPACE ISAC:

Threat intelligence and data sharing to ensure the security of business systems

Real time critical cyber and space intelligence that builds awareness of the threat environment through alerts, indicators, member insights, threat assessments and analysis.

Provides a voice for companies to share and report vulnerabilities that impact their organization and the broader space sector to each other, our government partners, and the supply chain

Join a global network of analysts, executives, and practitioners from the private and public sectors that share critical information and best practices through workshops, summits, meetings, webinars and working groups.

Access to critical industry reports, case studies, exercises, and playbooks to prepare and equip our members for potential cyber-attacks.
