OUR MEMBERS

Space ISAC members assist the global space community in identifying and responding to threats, sharing information, and mitigating risks to the space mission. Our members regularly convene to protect the commercial space sector and reduce operational costs by sharing threat intelligence, analyzing data to identify threat trends, conducting workshops, and enhancing knowledge through training.

Global Partner Agencies

COLLABORATION TO SECURE SPACE

Space ISAC provides space-related actionable threat intelligence and vulnerability disclosures, thought leadership and a voice at the table with public and private sector, and showcase member and partner capabilities to trusted global space community.

OUR MISSION

Space ISAC serves to collectively protect global space systems to secure the future of humanity and to be the primary communications channel for the global space community. Our members and partners are organizations that provide products or services to commercial and/or government customers that desire to be the most trusted in the global space community, except those in Space ISAC's prohibited countries.

BORN OF A SHARED NEED

Space ISAC was conceived in 2017 by the Science & Technology Partnership Forum to address information-sharing gaps in the cybersecurity and space community. The idea was presented at the 34th Space Symposium in April 2018, and Space ISAC was established a year later in April 2019 - now headquartered in Colorado Springs, CO. In 2020, Space ISAC joined as an official member of the National Council of ISACs, and since then, members have been collaborating to identify and respond to threats while reducing operational costs through intel sharing, trend analysis, workshops, and training. In 2023, Space ISAC became a participate in the EU Council of ISACs.
